AMANT DU CHATEAU

CANDY DE NANTUEL

STRENGTH AND RESPECT

The French Champion has proven on the sporting arena the value of his excellent pedigree! International performer, his first products are in his image: energetic, respectful with strength and a warrior's will.

FLEXIBILITY AND BALANCE

He is currently reaching high level competition with P. Leprevost and the quality of his progeny led him to be ranked 2nd best stallion for young horses in France. The oldest are now aged 7 and show as much energy and elasticity as their sire!

EDEN DU ROUET

BLOOD AND STRENGTH

He carries the genes of the amazing stallions Chacco Blue and Baloubet du Rouet, along with the damline of Baloubet! His first offspring show size, elegance and a very good locomotion. He himself is starting international competitions with great ambitions and has won his first ranking classes this year!

BLOOD AND LOCOMOTION

As popular in France as in the Benelux, our «almost Thoroughbred» represents a great opportunity for bringing back or keeping blood in showjumping horses without losing the aptitude. His first offspring are already jumping in CSI4* and he also seduces breeders of Eventing horses.

STAKKATOL

STRENGTH AND RIDEABILITY

He confirms his rank amongst the World's various Top 100 rankings and has been ranked 55th Best Sire of winners by the WBFSh. His offspring compete in CSI 4 and 5* GPs.

He combines strength, blood, a good frame and seems to pass on a very good rideability.

THE NEW PAX BREEDING ADVICE PROGRAMME

The new PAX – Breeding Advice Programme allows you to compare several stallions with your mare.

The PAX Express version of this programme enables you to easily compare 2 stallions according to the 11 most frequently used criteria and provides you with a result based on as little as 3 filled criteria. You can also sign in to the PAX Programme in order to access a more in-depth study and increase the number of stallions, register your mares, obtain the PAX suggestions and the graphic output, and use the Reverse PAX.

You will also find on each stallion page of our website the characterization that we drew up with for each one. This characterization is refined every year based on the data collected on our stallions' progeny. Our teams are at your disposal to help you characterize your mares and use the program as efficiently as possible.

It is now up to you to start using the PAX!
